FOREWORD

● The manufacture of shears and scissors is one of the arts which has not changed to any great extent through the years of mechanical improvement. It still requires the skilled workmanship which has always been necessary to produce a fine cutting instrument; practically the only contribution made by science to this art has been to provide finer grades of steel.

● These facts become significant in connection with the experience of more than fifty years which this Company has had in the manufacture of fine shears and scissors. This long period of continuous successful production insures a quality which can result only from a high degree of skill, acquired through many years of practice, coupled with the use of the best materials obtainable.

● In the following pages we offer you the results of these years of experience and our products are backed by our guarantee as to quality of workmanship and material.

EMBROIDERY SCISSORS ●

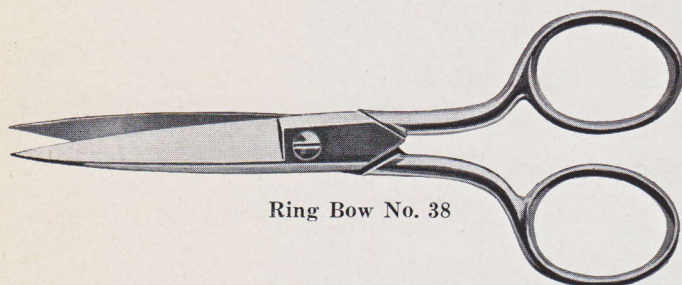

Ring Bow No. 4047

Ring Bow No. 4047, Flat Pattern

Solid Steel, Fully Nickel Plated

Full Length	Weight Per Doz.	Length of Cut
3½ in.	7 oz.	1¼ in.
4 in.	10 oz.	1½ in.

Plate Shear

No. S-93—Dental Pliers—Length 6 in.

Carefully made of Best Stainless Steel. Perfectly formed points, easy tension,—properly balanced with guimped or corrugated handles. Corrugated inside points—oval insides.

No. S-83—Similar to above. Except handles inside and outside. Moderately priced.

THE SHEARS, SCISSORS and snips shown on the preceding pages are of the type known as “solid steel”.

They are forged from as high a grade of steel as can be used for forging in one piece. They were originally produced to fill a demand for a moderately priced shear for general use in the home or factory, and, while the cutting edge is not as fine in quality as that on our “Steel Laid” line, this type of shear will give years of satisfactory service as an all-purpose tool for general utility.

Solid Steel Drop Forged Trimmers

Light Pattern—Two Finger Bow— Trimmer

Solid Steel, Fully Nickel Plated
No. 124X

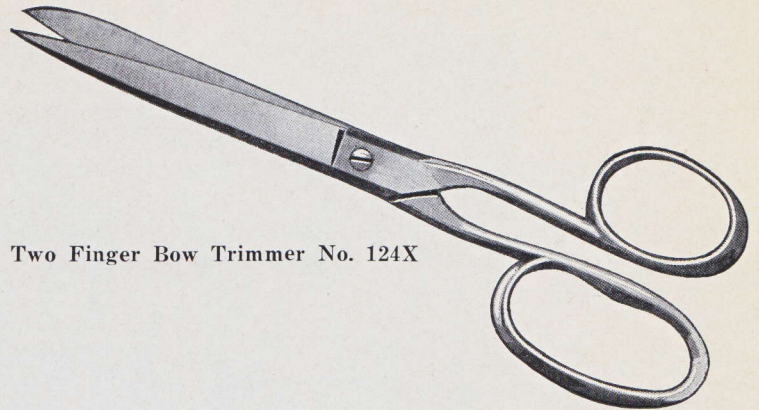

Full Length	Weight Per Doz.	Length of Cut

9 in.	88 oz.	4 $\frac{1}{2}$ in.

Household Shears No. 331

The Finest Solid Steel, Drop Forged Shears Obtainable at the Price.

STEEL LAID SHEARS

Stages of Manufacture

As shown in the above illustration, "Steel Laid" Shears and Snips are made by welding a blade of extra fine quality and hardness to a "frame" of forged steel.

This method of manufacture permits the use of a blade with a higher carbon content than can be used in forging. It is this high carbon content which gives these shears their durable, fine cutting edges.

These shears are recommended for use where it is necessary to cut fine fabrics continuously over a long period of time. It is our "Professional" and will give long service with very little sharpening.

Steel Laid Trimmers

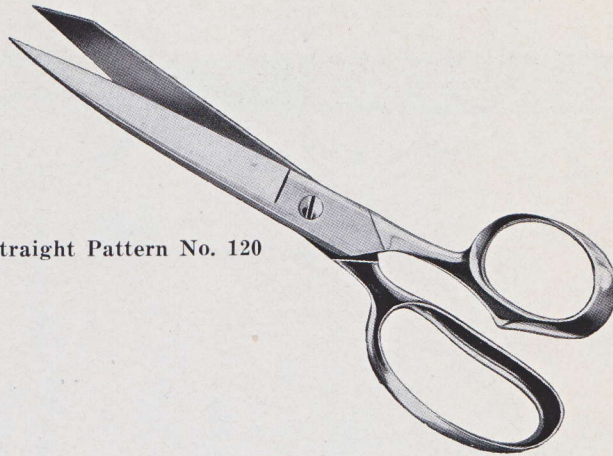

Inlaid Blade. High Carbon Steel Welded on inside of Blade. Gives Long Life to Edges Without Sharpening.

No. 120, Straight Pattern

Highly Polished, Fully Nickel Plated.

Full Length	Weight Per Doz.	Length of Cut
6 in.	30 oz.	2¾ in.

● SHEAR DISPLAY CABINET

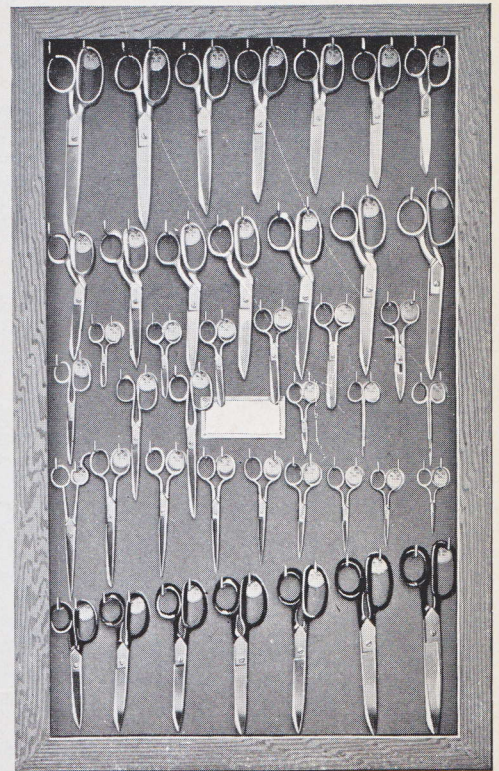

No. 9X Wall Cabinet

A case specially made for the dealer who wants the best. This cabinet is recommended by us as the best fixture for the display and sale of cutlery that we can offer.

Holds a complete and representative line, of all salable patterns and sizes.

You Will Like This Fixture

- 1 Product displayed attractively.
- 2 Reduces stock required.
- 3 Increases turnover.
- 4 Bigger profits.
- 5 Sells product.
- 6 Neat arrangement of stock.
- 7 Resale prices marked.
- 8 Eliminates mistakes.
- 9 No unsalable stock possible.
- 10 Easy to re-order.

9X Cutlery Case

Furnished In Oak Finish, Unless Otherwise Requested.

Dimensions: Width 22 in., Depth 4½ in., Height 35¼ in.

This cabinet is included free with a minimum assortment. For convenience we have made a standard selection of the best numbers, but the dealer has the option of selecting his own assortment according to his special requirements.

This cabinet is unusually attractive when mounted on standards. Frequently this is necessary where sufficient wall space is not available. Where standards are used the case can be placed on the floor, atop a display case or in show windows. Special standards are furnished when specified.

We have a special assortment for stationary stores.

SHEAR CABINETS ●

No. 8X Cabinet

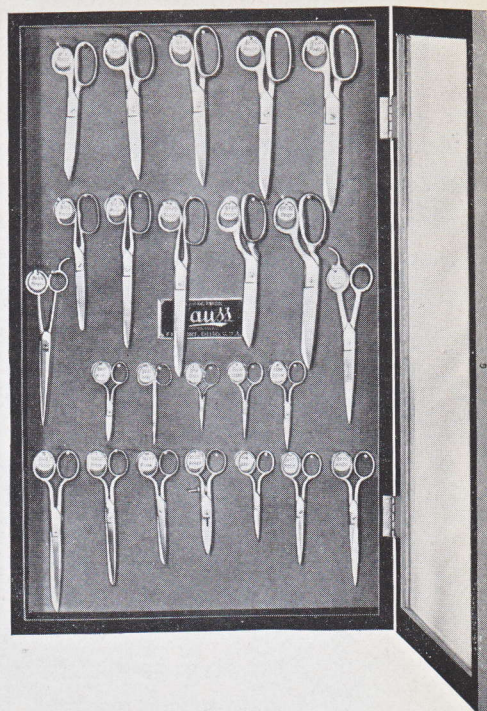

A case specially adapted for the smaller dealer who requires a smaller assortment.

Each item is tagged with stock number and size,—you cannot make a mistake.

You Will Like This Fixture

- 1—Product Displayed attractively.
- 2—Increase turnover.
- 3—Bigger profits.
- 4—Sells Products.
- 5—Neat arrangement of stock.
- 6—Resale price marked.
- 7—Eliminates mistakes.
- 8—No unsalable merchandise.
- 9—Easy to re-order.
- 10—Makes you a CLAUSS BOOSTER.

Don't wait, write us direct for details on this item.

Dimensions: Width 17 in., Depth 2¼ in., Height 27½ in.
Furnished in oak finish unless otherwise mentioned.
Standards are furnished only when requested.

Stationer's Cabinet

This cabinet is specially arranged for stationery stores. Items contained therein are big sellers.

You are overlooking a big opportunity if you do not order one today.

Each item is tagged with stock number and size,— you cannot make a mistake.

Don't wait, write us direct for details on this item.

Dimensions: Width 22 in., Depth 4½ in., Height 35¼ in.
Furnished in oak finish unless otherwise mentioned.
Standards furnished only when requested.

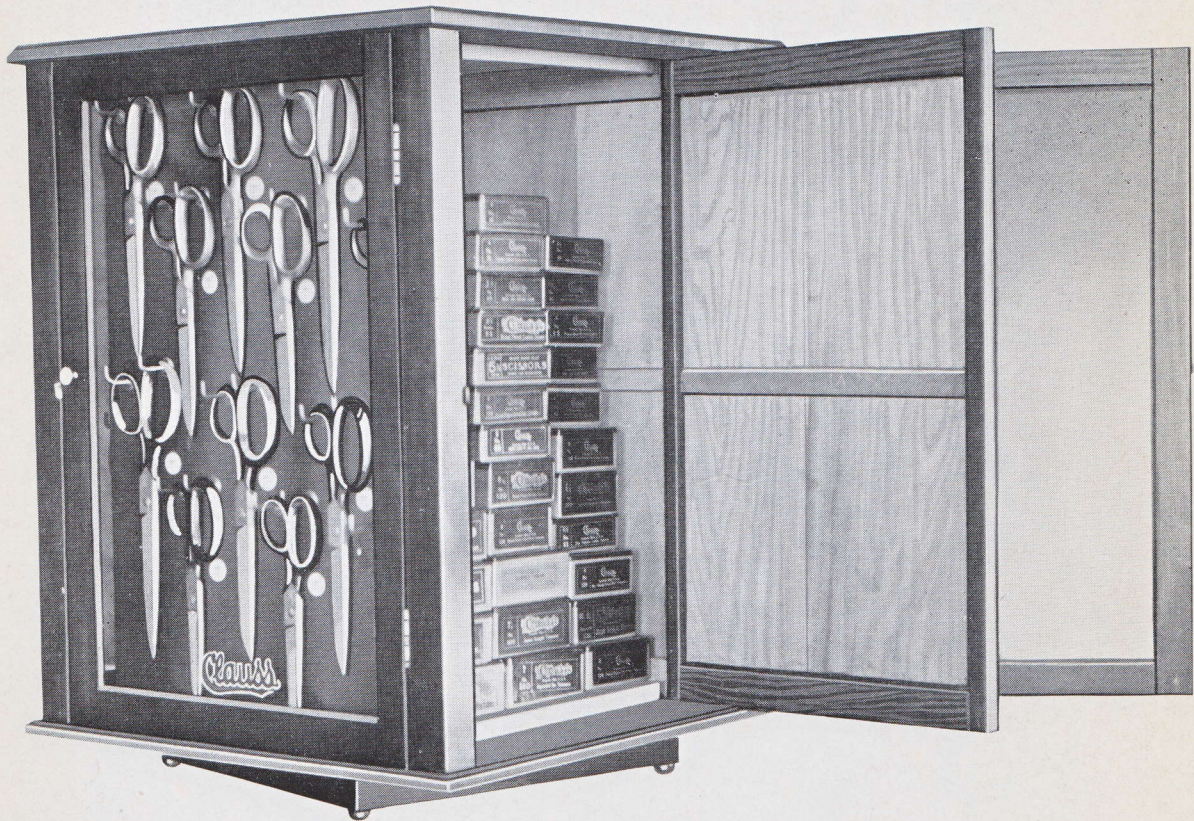

An improved Cabinet which will help you increase your sales

No. 10 X Revolving Display Cabinet

Equipped with ball-bearings

Dimensions: Height 19½ in., Depth 16 in., Width 16 in.

The hooks on display plaque are made to hold at least three pairs of shears,—the quantity being governed by the size of Shears or Scissors.

Will accomodate 40 pairs of Shears and Scissors.

Illustration shows how surplus stock is stored.

The display plaques are furnished with Tangerine felt.

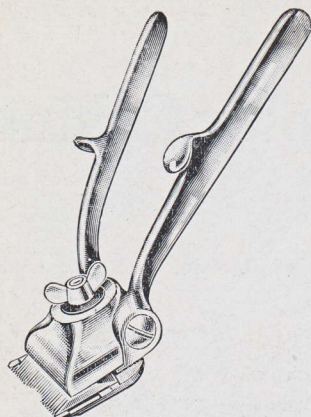

The standard finish of cabinet is Mahogany,—but an Oak finish is furnished if requested.

Each item bears a button giving Stock No., size and suggested resale price.

Above illustration shows how surplus stock is carried on the inside of the cabinet. It is not exposed to view, of course, when display panels are properly closed to display the merchandise.
